

# RWM CE2000

## Technical Specification

Compactors are increasingly popular waste handling solutions for organisations with larger volumes of general waste or recyclables, who are regularly filling skips with their material arisings.

Highly configurable to suit your individual requirements, the RWM CE2000 is an extremely clever, yet compact and easy-to-operate static machine, which typically offers hassle-free 4:1 volume reduction of dry commercial and industrial waste.

- Intelligent electronics and hydraulics for compaction
- Optimum payloads + less lifts = **more savings**
- **75% and 100% full light** for efficient waste collections
- State-of-the-art data management e.g. **SMS/Email alerts**
- Variable filling levels, full and machine fault status
- **Automatic pin off system**
- **Twin hydraulic rams** and **32 tonne compaction force**
- **Low maintenance** with remote diagnostics
- **CE certified** with dual channel safety circuits and emergency stop
- Can be used in isolation or with a baler
- Optional auxiliary equipment available

# RWM CE2000

## Technical Specification

Compaction Force	32 Tonnes
Loading Aperture	1500 x 1200mm
Loading Height	1225mm
Volume Per Hour	142m
Charge Box Volume	1.5m
Cycle Time	38 seconds
Motor	5.5kW
Ram Stroke	736mm
Blade Penetration	320mm
Overall Dimensions (H x W x L)	2400 x 2035 x 2710mm

**Operating Voltage** – 415v.  
24V control circuit.  
**Connector plug fitted** – 20amp  
three phase. N+PE  
Type D circuit breaker or motor  
rated fuses
